4. Claims 1-11, 13-14, 16-21 and 23-27 are pending. All the pending claims are allowed.

5. The following is an examiner's statement of reasons for allowance:

The closest prior art of Lewis (U. S. Patent 6,233,576) teaches enhanced security for computer system resources with a resource access authorization control facility that creates files and provides increased granularity of resource permission.

Art Unit: 3621

Another two close related prior art are Dircks (U. S. Patent 6,584,568) and Anand (U. S. Patent 6,044,466). Dircks discloses allowing a network administrator to remotely create, protect, and manage desktops and control file systems across a network. Anand discloses flexible and dynamic derivation of permissions.

In regarding to independent claims 1, 16-21 and 27, Lewis, Dircks, and Anand taken either individually or in combination with other prior art of record fails to teach or suggest a client profile comprising the preference information for at least one of the clients and the permission information, and managing relationships that are defined between clients via the electronic communication medium with respect to the digital facility based on the profiles of the clients.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
